

Alexander Ricciardi

Computer science and AI adjunct instructor candidate

PYTHON | JAVA | C++ | ARTIFICIAL INTELLIGENCE | MACHINE LEARNING

Cheyenne, Wyoming | (308)-672-3756 | alex.omegapy@gmail.com | LinkedIn: [linkedin.com/in/alex-ricciardi](https://www.linkedin.com/in/alex-ricciardi) | My GitHub: github.com/Omegapy | My Blog: alexomegapy.com

Profile

Computer science professional and a Master of Science student in Artificial Intelligence and Machine Learning. Has a Bachelor of Science in Computer Science, Summa Cum Laude, and an Associate of Science in Computer Science, High Distinction. Technical field-service experience since 2008. Seeking a remote adjunct or instructor role while completing the master's degree.

Teaching interests and subject areas

Introductory programming, Python, Java, C++, data structures and algorithms, artificial intelligence, machine learning, operating systems, software development, databases, computer systems, and technology ethics.

Education

Master of Science in Artificial Intelligence and Machine Learning	Expected Graduation March 14, 2027
Colorado State University Global	
Bachelor of Science in Computer Science	August 2025
Colorado State University Global Summa Cum Laude	
Coursework. Operating Systems and Architecture; Software Engineering; Database Management; Networks; Cybersecurity; Java; Python; C++; Artificial Intelligence; Data Structures and Algorithms.	
Associate of Science in Computer Science	December 2023
Laramie County Community College High Distinction Honors	
Certificate of Completion, Full Stack Web Development	June, 2018
The Array School of Technology and Design	

Academic projects

CubeSat telemetry anomaly detection	2026 - current
CSC510 course AI portfolio project, Colorado State University Global	
• Developing a Python decision-support program that uses neural-network classification and A* search to analyze CubeSat telemetry anomalies.	
Mining Regulatory Compliance Assistant	2025
Bachelor of Science capstone project	
• Built a mine regulatory AI-powered assistant that queries Mine Safety and Health Administration regulations.	
• Combined an Advanced Parallel HybridRAG – Intelligent System that combines VectorRAG and GraphRAG retrieval with context fusion using Python, FastAPI, Neo4j, Streamlit, and Docker.	
Public computer science academic portfolio	2022 - current
GitHub portfolio repo. showcasing code, papers, and projects.	
• Publicly provides coursework and projects in Python, Java, C++, artificial intelligence, algorithms, operating systems, databases, networks, software engineering, cybersecurity, Android development, and graphics.	

Professional experience

Copier Technician	2008 - present
Rocky Mountain Business Equipment Technical field service since 2008	
• Repair, perform preventive maintenance on, and install office equipment for business customers.	
• Service Kyocera copiers, printers, facsimiles, scanners, and related multifunction systems.	

Master's Progress

CSC510 Foundations of Artificial Intelligence	In progress
CSC507 Foundations of Operating Systems	A / 4.0
CSC506 Design and Analysis of Algorithms	A / 4.0
CSC505 Principles of Software Development	A / 4.0
CSC502 Ethical Leadership in Software Development	A / 4.0
CSC501 Management for the Computer Science Professional	A / 4.0
CSC500 Principles of Programming, Python	A / 4.0

Skills

Programming. Python; Java; C++; Kotlin; JavaScript; SQL; HTML; CSS.

AI and data. TensorFlow; PyTorch; NumPy; Pandas; Jupyter; Matplotlib; Plotly; neural networks; retrieval-augmented generation; knowledge graphs.

Development. FastAPI; Streamlit; Docker; Neo4j; MySQL; Git; GitHub.

Academic communication. Technical reports; APA research writing; public code examples; project documentation.
